BOISE, ID

EDUCATION

THE COLLEGE OF IDAHO – CALDWELL, ID

Bachelor of Science in Computer Science-Mathematics

Minor in Data Science

Expected Graduation: **December 2026**

3.97 GPA

Member of the Gipson Honors Program and Omicron Delta Kappa Honor Society

Relevant Coursework:

- Statistical Machine Learning, Data Manipulation & Visualization, Applied Databases, Design & Analysis of Algorithms, Multivariable Calculus, Linear Algebra

TECHNICAL SKILLS

- **Python**
 - pandas, scikit-learn, numpy, plotnine, matplotlib, scanpy, scikit-allele...
- **R**
 - reticulate, Shiny, tidyverse (ggplot2, tidyr, dplyr, ...)
- **SQL**
 - SQLite, SQL Server
- **C#**
 - Blazor & MVC web apps
- HTML & CSS
- Git & GitHub
- Microsoft Office & Windows 10/11

PROJECTS

STUDENT OUTCOMES DASHBOARD

- Planned and executed the development of a Shiny dashboard that visualized student outcomes for faculty reports
- Acted as a manager for a team of ~20 computer science students
- Independently developed workflow optimizations

MASTODON TREND SPOTTER

- Developed a dashboard to compare the popularity of and sentiment around topics on Mastodon
- Utilized Mastodon's API to fetch posts by tag
- Used the reticulate package to integrate Python and R
- Performed multilingual sentiment analysis using a HuggingFace model

EMPLOYMENT HISTORY

THE COLLEGE OF IDAHO – 2112 CLEVELAND BLVD, CALDWELL, ID 83605

StatLab Research Assistant

May 2026 – July 2026

- Utilized PCA, PCoA, DAPC, and other supervised and unsupervised machine learning techniques to determine the original seed zone of artificially transplanted *C. dentata* trees based on single nucleotide polymorphism (SNP) data
- Independently researched and executed specialized analyses suited for the available data and research questions
- Engaged in intense data cleaning operations to convert raw genetic data into analysis-ready formats
- Utilized the Borah cluster at Idaho National Laboratories to parallelize analysis jobs and improve efficiency
- Created effective visualizations using matplotlib and [presented my findings](#) at the Idaho Conference for Undergraduate Research

OPPENHEIMER COMPANIES, INC. – 877 W MAIN ST #700, BOISE, ID 83702

Software Development Intern

June 2025 – August 2025

- Built a Blazor web app with EDI management features for use by customer service agents
- Worked on features such as document uploads/storage and addressed numerous bugs in a freight management MVC app
- Built an Azure logic app to alert customers to changes in the status of their freight loads
- Worked with triggers in a SQL database to log critical updates
- Presented regular reports of my progress to both technical and non-technical audiences
